

Ashlar Park Series Brick

Build With Unmatched Depth & Quality

Product Description

Ashlar Park Brick adds an extra dimension to General Shale's well known textured brick products. The most compelling characteristic is the unique look created by the bundling of three individual sizes within each product: Full Single Units (2 1/4" x 7 5/8"), Double Units (4 7/8" x 7 5/8") and Triple Units (7 5/8" x 7 5/8").

Application Methods

Ashlar Park Brick provides two methods of application in both residential and commercial structure exteriors:

1. Standard flush application for a traditional look and feel.
2. Reveal out/extend beyond the wall for a more unique look with added depth and texture.

Packaging

Ashlar Park Brick are packaged to cover 50 sq.ft. of wall area. Each package contains 252 single, 28 double and 14 triple units.

Color Options

Ashbrook Park

Eastover Park

Essex Park

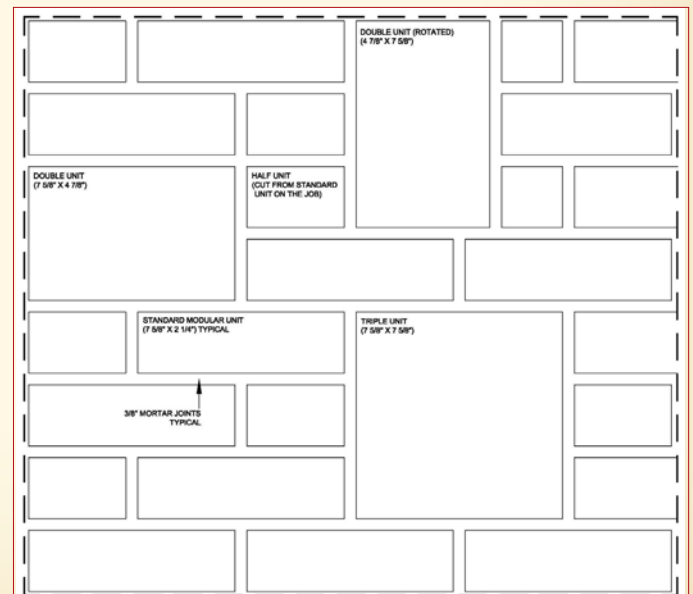

Rockbridge Park

Woodrose Park

Installation

Ashlar Park Brick install like brick veneer units using standard masonry mortar. While installing facing brick in a random pattern is most visually appealing, the pattern in the design template below should be followed to maximize usage of all units.

**Recommended
Design Template**

Half units shown in the pattern above are not pre-cut in the package; these units are to be cut on site from single units.
