Manufactured Stone Veneer

VS Natural Quarried Stone Veneer

- Not weight bearing, no need for a footer or additional reinforcement and expansion joints
- Competitively priced to be well within budget constraints
- Much larger variety of colors and shapes

Featured Residential Applications

Weatherledge

KODIAK RIDGE

- The Weatherledge series is an attractive interweaving of stone that will make your next venture stand out.
- Eye-catchingly honed, its style is not as rugged or complex. It is characterized by smoother edges and rectangular pieces that draw you in to its allure.

1. INSTALLATION OVER WOOD FRAMING

2. INSTALLATION OVER CONCRETE MASONRY UNITS

APPLYING THE METAL LATH

Apply a moisture barrier of housewrap and 30 pound felt. Overlap horizontal joints 5 inches and vertical joints 8 inches. All corners must be wrapped a minimum of 16 inches. Then apply 2.5 pound metal lath or equivalent. Metal lath must be overlapped in the same manner as the felt. Fasten with wide crown staples at least 1 inch in length. Make sure all chimneys and windows are properly flashed.

APPLYING THE SCRATCH COAT

Apply a scratch coat using Type M or Type N mortar, approximately 1/4 inch to 1/2 inch thick. Make sure the mortar is not too wet or too dry.

APPLYING THE STONE

Install corners first. Spread mortar evenly on the back of the stone, approximately 1/2 inch thick. When applying the stone to the wall, move the stone back and forth a little bit in a circular motion. Make sure your mortar is not too dry or too wet for proper bonding. In hot weather you may need to wet down the back of the stone or the scratch coat.

GROUTING INSTRUCTIONS

Use a grout bag to grout the joints, making sure you do not get cement on the face of the stone. Let the grout joint set up until it is slightly dry, then strike the joint with a jointer or other similar implement. Make sure it isn't too wet or too dry. If the mortar wets or stains a brush it is too wet. Brush out the joints with a soft brush.

- 50 year Limited Warranty from the date of purchase, when installed to Manufacturer's instructions and according to local building codes. Warranty does not cover damaged product resulting from building settlement, wall movement, improper installation, or discoloration due to airborne contaminants.
- The Contractor and Architect are responsible for proper installation. Prestige Stone Products, LLC is not responsible for the structural wall surface it is applied to. Make sure to follow all of your local building codes. Building codes will vary from state to state, county to county.
- Warranty is subject to all other terms of the written warranty, a copy of which can be obtained from your dealer or by visiting:
