

How-To Assemble Your

ENTERTAINER 75

Round Fire Pit

PART NO. FPR-75

DIFFICULTY BEGINNER

APPROX. HEIGHT 1'2½"

INSIDE DIAMETER 2'3"

OUTSIDE DIAMETER 3'5"

APPROX. WEIGHT 700 lbs.

GENERAL SHALE OUTDOOR LIVING PRODUCT WARRANTY

All General Shale Outdoor Living products are warranted to be made from high quality materials that meet or exceed ASTM material standards. Outdoor Living products are intended for recreational or residential use and are not warranted for any other purpose. The life of the product depends on correctness of installation and extent of usage. All metal components are subject to normal rust and corrosion.

ANY IMPLIED WARRANTIES ARE HEREBY DISCLAIMED AND ARE EXPRESSLY EXCLUDED.

Materials included with your outdoor kit.

- (60) Multiuse Landscaping Stones (pictured)
- (4) Cast Concrete Top Pieces
- (1) Thin Set Mix Bag

Additional materials required to install your kit.

- Concrete or Gravel (for setting base)
- Level
- Tape Measure
- Rubber Mallet
- Small Trowel

Multiuse Landscaping Stones

NOTE: This unit is designed for outdoor use only. This unit is not designed to be used on wood decks or under roof enclosures. Locate unit reasonable distance from any combustible materials. Comply with local building code(s) and burning permits as applicable. Retain these instructions with unit.

**Step
1**

Create a level base using Crusher Run Stone to accommodate the 3'-5' diameter of the fire pit.

- Prepare an area 4' (wide) x 4' (deep).
- Remove sod and vegetation.
- Excavate/remove soft soil as required to provide level stone surface at a minimum of 4" deep.
- If required, use landscape blocks to retain stone base.
- If installing optional hearth/knee wall, extend base as required.

If soil under sod is hard, soil can be leveled out and used as a base material.

Reference diagrams for creating a level base.

(Base Section View)

**NOTE: Base thicknesses shown are minimum.
Softer soils will require thicker bases.**

(Base Plan View)

NOTE: All outdoor living kits can be installed directly on a properly prepared stone base. However, for best performance and appearance, a concrete pad is recommended.

**Step
2**

Build the fire pit.

- Each course will use (15) multiuse landscaping stones.
- Dry stack courses 1 through 4 and check fit before applying adhesive. Adjust gap and position block as needed.
- Apply thin set between all pieces and courses. Apply away from the outside edge to prevent it from potentially squeezing out onto the outside between courses.
- Level stones by tapping with rubber mallet as needed. Use caution to avoid squeezing thin set out from between stones.
- Check to make sure each course of the fire pit is level.

TIP *For best appearance, the vertical joints of each following course should align with the center of the stones from the course below. (See Course 4 image on page 5)*

Courses 1 through 4

(15) Block “A” Circle Landscaping Stones

Course 4

(*NOTE: After completing the fourth course, the fire pit should look like the picture above.)

**Step
3**

Continue building the fire pit.

- Adhere the four (4) cast concrete top pieces using thin set provided. Ensure the assembled top aligns evenly with the course below.

Course 5

(4) Cast Concrete Top Pieces
