

## Edge Rock

Aptly named, our Edge Rock Building Stone features sharp lines and dynamic edges. The split face finish creates a natural look that is both contemporary and rugged.

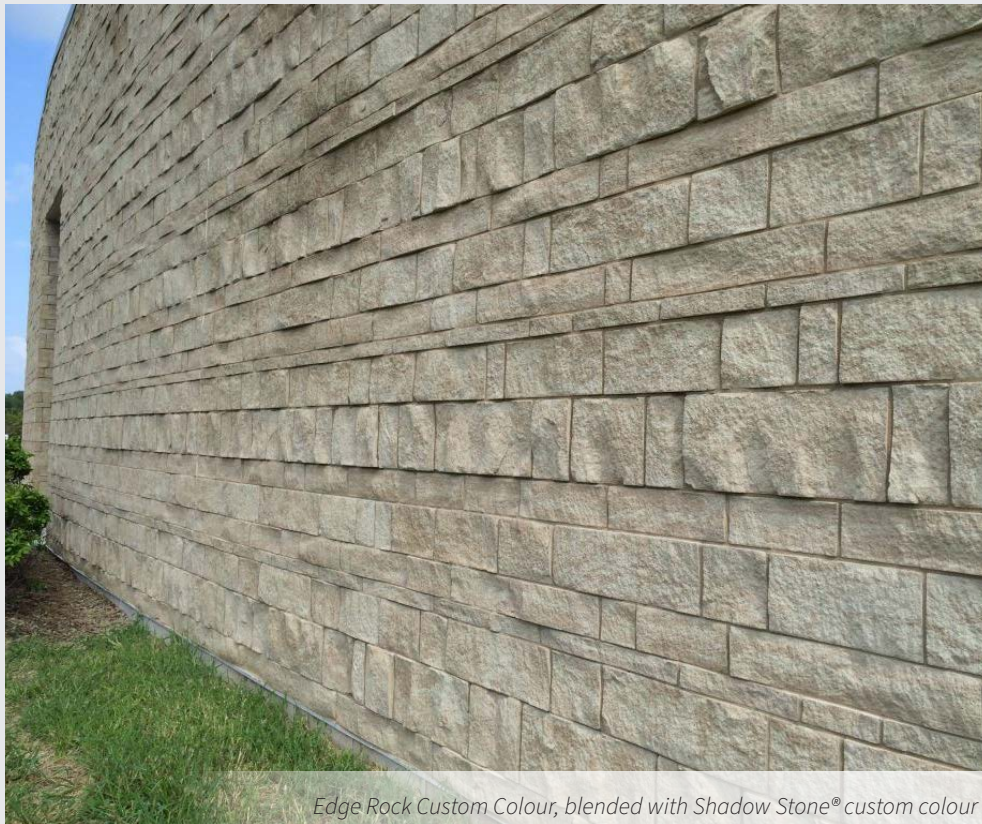

Edge Rock is comprised of a combination of two sizes and features four colours: Collingwood\*, Delta, Glacier, Steel Grey\*

EDG50	4-15/16" H x Random L x 3-1/2" ( $\pm 1/2$ ") D
EDG102	10-1/4" H x Random L x 3-1/2" ( $\pm 1/2$ ") D

\*Collingwood and Steel Grey available in EDG102 Size Only.  
(Use SHA/UL50 for 2-Unit)

We're pleased to introduce two new colours to match our Shadow Stone Building Stone. These two rich colours provide even more opportunity for those unique combinations.

Edge Rock is a simple to install Building Stone. Two sizes allow for easy coursing. When used like this, the look is rugged and robust.

But don't be fooled by its simplicity; when Edge Rock is combined with Shadow Stone® in an ashlar pattern, the size range adds extra boldness to a normally sleek look. Or, go in a completely different design direction and lay the stone combination in a running bond.
