

Webinar Wednesdays

Fall 2021

Webinar Wednesdays are back! We are pleased to offer our courses online once again. We will repeat some of our most popular webinars for those that missed them the first time around.

We invite architects, designers, technologists, masons and anyone interested in learning about Arriscraft and our partners. Webinar Wednesdays will allow access to our presentations on a computer, from anywhere in North America. Our courses are AIA accredited, and can also be used towards OAA, ARIDO and ASID learning credits, as well as many others. In many cases, credits can also be self-reported.

September 22 | Proper Masonry Detailing (*NEW*)

AIA Program Number: PMD3

LU Hours 2.00 / HSW

<https://attendee.gotowebinar.com/register/7506876473652874252>

In this presentation, we discuss the design and construction factors that impact the long-term performance of masonry veneer wall assemblies. We will also delve into the Energy Codes and how full-bed masonry wall assemblies meet or exceed the requirements for energy efficient building design. We will dive into architectural detailing for masonry veneers that promote moisture management principles as well as considerations for the proper control of movement in masonry walls.

November 17th | Just Hanging Out on the Wall – Masonry Rainscreens

AIA Program Number: JHMR2

LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/3837036513625010700>

To discuss Masonry Veneer Rainscreens and the wide variety of potential uses for them including new and renovation applications. This course covers how to meet the requirements of the Energy Code when utilizing these assemblies.

October 20 | Pushing The Envelope – Continuous Insulation Solutions for Thin Adhered Masonry Veneers

AIA Program Number: PTEICB

LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/2130547188316633100>

We will discuss and explore Engineered and Tested Continuous Insulation (CI) solutions for thin adhered masonry veneers to meet the requirements of the Energy Code anywhere in North America.

December 15th | Look to the Interior - Thin Masonry for Internal Beauty and Design (*NEW*)

AIA Program Number: LITMIB

LU Hours 1.00 / HSW

<https://attendee.gotowebinar.com/register/1652093603978340620>

This program will discuss the many ways thin masonry can bring a sense of warmth and dynamic aesthetics to any interior. We'll explore how thin masonry can range from classic and traditional to sleek, contemporary and modern. While many people think of masonry as an intriguing and thought-provoking exterior cladding material, thin masonry can continue that theme to the interior. With so many different options for thin masonry including Thin Brick, Thin Natural Stone, and Thin Calcium Silicate, the world is your oyster when it comes to creating beautiful and stunning interiors.
